Object:	Lion of Knidos
Museum:	Antikensammlung Am Lustgarten 10178 Berlin 030 / 266425101 ant@smb.spk-berlin.de
Inventory number:	SK 1724

Description

The lion of Knidos is characterised by an upright leaping stance and a gaunt, doglike body with tense muscles and sharply protruding ribs. The massive, peacefully resting Ionian cats of prey, like the lion of Miletus displayed opposite, appear distinctly different.
